FOR INSTITUTIONS

FOR RESEARCHERS

FOR JOURNALS

### Evaluation of Universities and R&D Centres

Service focused on the evaluation of the research activity of R&D institutions. We elaborate reports measuring institutional research performance by means of bibliometric indicators of impact, output and collaboration. We also prepare and update the necessary indicators for calls for funding (Campus de Excelencia, Severo Ochoa, etc.) or for assessing R&D programs.

### Preparation of accreditation and tenure processes

Service focused on the preparation and presentation of applications to accreditation and promotion calls. We offer a personalized assessment, we provide publishing guidelines and strategies, and search of impact evidences when filling in application forms. This service is provided through [sexenios.com](http://www.sexenios.com).

### Evaluation of Publishers and Scientific Journals

Service focused on publishers and scientific journals in order to improve their editorial processing and management, regarding issues such as dissemination and impact or indexing in databases. We also provide consultancy services destined to the normalization and implementation of international standards as well as the preparation of bibliometric reports.

+ Teaching and specialized courses on Bibliometrics and Scholarly Communication

## Research Group Research Evaluation and Scientific Communication

The **EC3 Research Group** was founded in 1997 in the University of Granada, developing its research and professional activities in the field of bibliometrics. Therefore all the services and products offered by the Spin Off EC3metrics B.V. have as a central hub the evaluation of the research activity. We are specialized on the development of tools (reports, scientific information systems, indicators, etc.) that help decision makers and research managers when adopting decisions in the research policy arena. Increasing the research impact and visibility of researchers and institutions as well as assessing them when applying for research funding.
